### DETAILED ACTION

Claims 5 – 9 have been examined.

Claims 1 – 4 have been canceled.

Claims 5, 6 and 8 have been amended.

#### *Requirement For Information*

1. The response to the Requirement under 35 U.S.C. §105 has been reviewed. The Requirement For Information which is binding on Applicant(s), Assignee and Applicant's representative states the parties "... the item cannot be readily obtained and provided.". the item being documentation on Telelogic Tau C-micro disclosing the feature on "light integration". In view of the parties statement the Requirement is complete/

#### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 5 – 9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The current focus of the Patent Office in regard to statutory inventions under 35 U.S.C. § 101 for method claims and claims that recite a judicial exception (software) is that the claimed invention recite a practical application. Practical application can be provided by a physical transformation or a useful, concrete and tangible result. No physical transformation is recited and additionally, the final result of the claim is for porting software which is not a tangible result because the mechanism is not claimed to be on a computer readable medium. Art Unit: 2193

Claim 5 has receiving variables into the multiple threaded operating environment and the implementation is by reference. The claim fails to perform an action that stores the result on a computer readable medium. It appears to the Examiner that the "reference" is claimed to be stored in the operating system environment will overcome this rejection.
